

¿Which PrecisionTM 2X Mastermix do I need?

PrimerDesign Precision MasterMixes are all based on the same high quality core formula. However because some real-time PCR machines require slightly different chemistries we supply a range of products to suit your requirements:

For example, if you are using SYBR green as your detection chemistry then we can premix this for you for free. '-SY' should be part of the catalogue number when ordering.

For example: Catalogue number '**Precision-R**' becomes '**Precision-R-SY**'

Real time PCR Equipment	Description	Reference
ABI 7000	Precision MasterMix with ROX	Precision-R
ABI 7300	Precision MasterMix with ROX	Precision-R
ABI 7500	Precision MasterMix with low ROX	Precision-LR
ABI 7700	Precision MasterMix with ROX	Precision-R
ABI 7900	Precision MasterMix with ROX	Precision-R
ABI StepOne	Precision MasterMix with ROX	Precision-R
ABI GeneAmp 5700	Precision MasterMix with ROX	Precision-R
BioRad iCycler (all models)	Precision MasterMix for the BioRad iCycler	Precision-iC
Stratagene MX (all models)	Precision MasterMix for Stratagene hardware	Precision-MX
Opticon and Chromo4 (all models)	Precision MasterMix	Precision
RotorGene (all models)	Precision MasterMix	Precision
Roche LightCycler 480	Precision MasterMix	Precision
Roche LightCycler 1.0-2.0	Precision MasterMix for capillary LightCyclers	Precision-CL
Eppendorf Mastercycler	Precision MasterMix	Precision
Fluidigm BioMark	Precision MasterMix	Precision
Cepheid SmartCycler	Precision MasterMix	Precision
